

## Release note

### Feb 10, 2026

- Added live date/time in chat UI header and message metadata.
- Completed localization for new flows (Refill, Complaint) across EN/TA/TE/HI.
- Added localized option rendering for buttons/choices in active flows.
- Added and passed tests for new flows (7/7 passing).

### • Feb 9, 2026

- Implemented real Refill flow:
  - Product -> Quantity -> Confirm/Edit/Cancel -> End.
- Implemented real Complaint flow:
  - Type -> Description -> Submit/Edit/Cancel -> Ticket ID.
- Added state transitions, validations, and summary rendering for both flows.

### • Feb 8, 2026

- Expanded Main Menu options:
  - Book Masala, Refill, New Application, Emergency, Complaint.
- Added safe handling for non-implemented menu branches (no flow break).

### • Feb 7, 2026

- Improved full multilingual chat behavior:
  - Prompt text + labels + message text switch by selected language.
- Added cleaner language-change behavior per selection (EN/TA/TE/HI).

### • Feb 6, 2026

- Strengthened app architecture:
  - API-first chat endpoints (/api/state, /api/message, /api/reset).
  - SQLite persistence for orders/chat/admin data.
  - Admin auth + config + analytics routes.
  - Payment abstraction layer (demo provider), lifecycle/status handling.
